COMPANY PROFILE

Conveyor Systems | Conveyor Belts | Conveyor Chains | Conveyor Parts

OUR VISION

To be recognised as a leading conveyor manufacturer and the provider of choice for conveying systems in various sectors.

OUR MISSION

To strive always to deliver excellence by providing superior design and technology, using the finest components available worldwide, and to always provide prompt and efficient after-sales service.

WHAT WE DO

Ultraplast has been designing and manufacturing various types of conveyor systems since 2009. Starting as a Distributor of European make Conveyor Belts and Conveyor Chains in 2000; Ultraplast has been continuously extending its field of expertise and became one of the leader manufacturers of conveyors for Packaging and Unit handling.

The company offers a comprehensive range of conveyors for both primary and secondary packaging. Conveyable products go from beverages, food and e-commerce & logistics Industry.

Automated construction processes allow for manufacturing of complete production conveyor lines at very competitive prices and with short delivery turnaround. Our conveyors and turn-key solutions are designed for minimum maintenance and energy costs.

BUSINESS SECTORS

BEVERAGE

Advanced integrated conveying systems and conceptualisation of automation for Food & Beverage manufacturing lines and processing.

DAIRY

Advanced integrated conveying systems and conceptualization of automation for Dairy products manufacturing lines and processing.

FOOD

The food industry has a large array of packaging solutions all strictly related to product features. Whether it's Metal, Glass, Paper or Plastic Packaging. ULTRAPLAST offers complete conveyor lines satisfying both efficiency & hygienic production requirements.

PERSONAL & HOME CARE

Personal & Home Care Products like cleaning agents, lotions, and medicines include various, appealing and complex packaging shapes. Unstable containers with asymmetric design require tailored guide solutions and engineering services. Thanks to more than 10 years of experience ULTRAPLAST guarantees high product conveying lines conveying efficiency for highly demanding production lines.

SECONDARY PACKAGING

Secondary Packaging mainly for palletizing purposes includes packed items such as bundles, trays, bottle/cans packs, cartons, crates and bags for the handling of bigger and heavier loads such as pallets of steel structures. ULTRAPLAST offers tailored solutions to satisfy the most demanding customers' requests. Complete conveying lines include various modules for elevating, dividing, cooling, turning and tray forming.

"SPARE PARTS"

We use all our components from **System Plast**, **Rexnord** & **Ammeraal Beltech** for high quality and reliability.

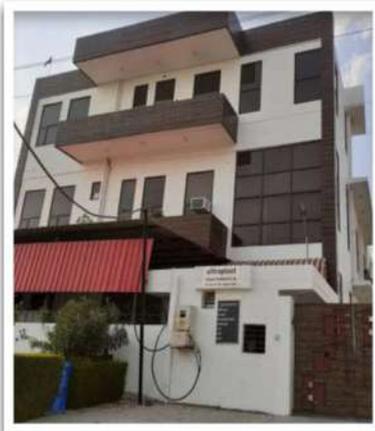

System Plast is a global leader in high-quality plastic conveyor chains, modular plastic belts, and industry-leading conveying components. They also have manufacturing and service centres located strategically around the world.

Rexnord is a multiplatform industrial leader with exceptional and trusted brands including Flat Top Chains, MatTop Chains, Patented Solutions for Air Conveying, IS light and Life Lubricated Bearings.

Ammeraal Beltech Offers completely hygienic and washable Homogeneous SOLIFLEX PU belts for the Food Industry. They are made from a single piece of Homogeneous Polyurethane and do not fray or contaminate food, leading to enhanced Food Safety Measures.
